Driven IT Solutions
In London.

Understanding your Business.

Innovative, flexible & trusted

We at TipTop IT are your innovative, flexible, and trusted IT Managed Service provider. Highly experienced, with hundreds of very satisfied clients, our priority is to provide an exceptional IT service that makes a positive immediate impact by adding real value to you and your business.

London based, London service

Established 10 years ago, at the heart of our Mayfair based business is our attentive Mayfair quality managed IT service, that underpins an achievement we are extremely proud of; 98% customer retention since start-up days.

Our team

TipTop is a close-knit team and is run like a family business. Davide, TipTop's Managing Director, feels that this is the cornerstone of this growing and thriving operation. When we say 'everyone knows your business' we mean it, as each team member supports all clients, and not just a selection.

The Challenges.

Are you being [held back] by your current IT Provider?

Poor Collaboration?

Strengthen communication and collaboration among all stakeholders within your business; whether colleagues, clients, or partners.

Mitigate Risks?

Achieve affordable and accessible technology that tackles threats and overcomes the costs associated with downtime or disruption.

Working Remotely?

Get ahead of new working challenges by solidly connecting your team wherever they may need to work, whenever they need to work.

Our Approach.

The defence of your data is no longer an option – it is essential! You become more likely to be targeted by cyber crime every passing day, simultaneously the burden of legislation and regulatory compliance rises also.

How we can help you.

All done for you.

We possess years of technical and commercial expertise to provide you with the right business-focused technology solutions.

A security-first approach

You will not hear any technical talk from us. With clear, concise and straight-forward solutions, we'll talk in a language you can appreciate.
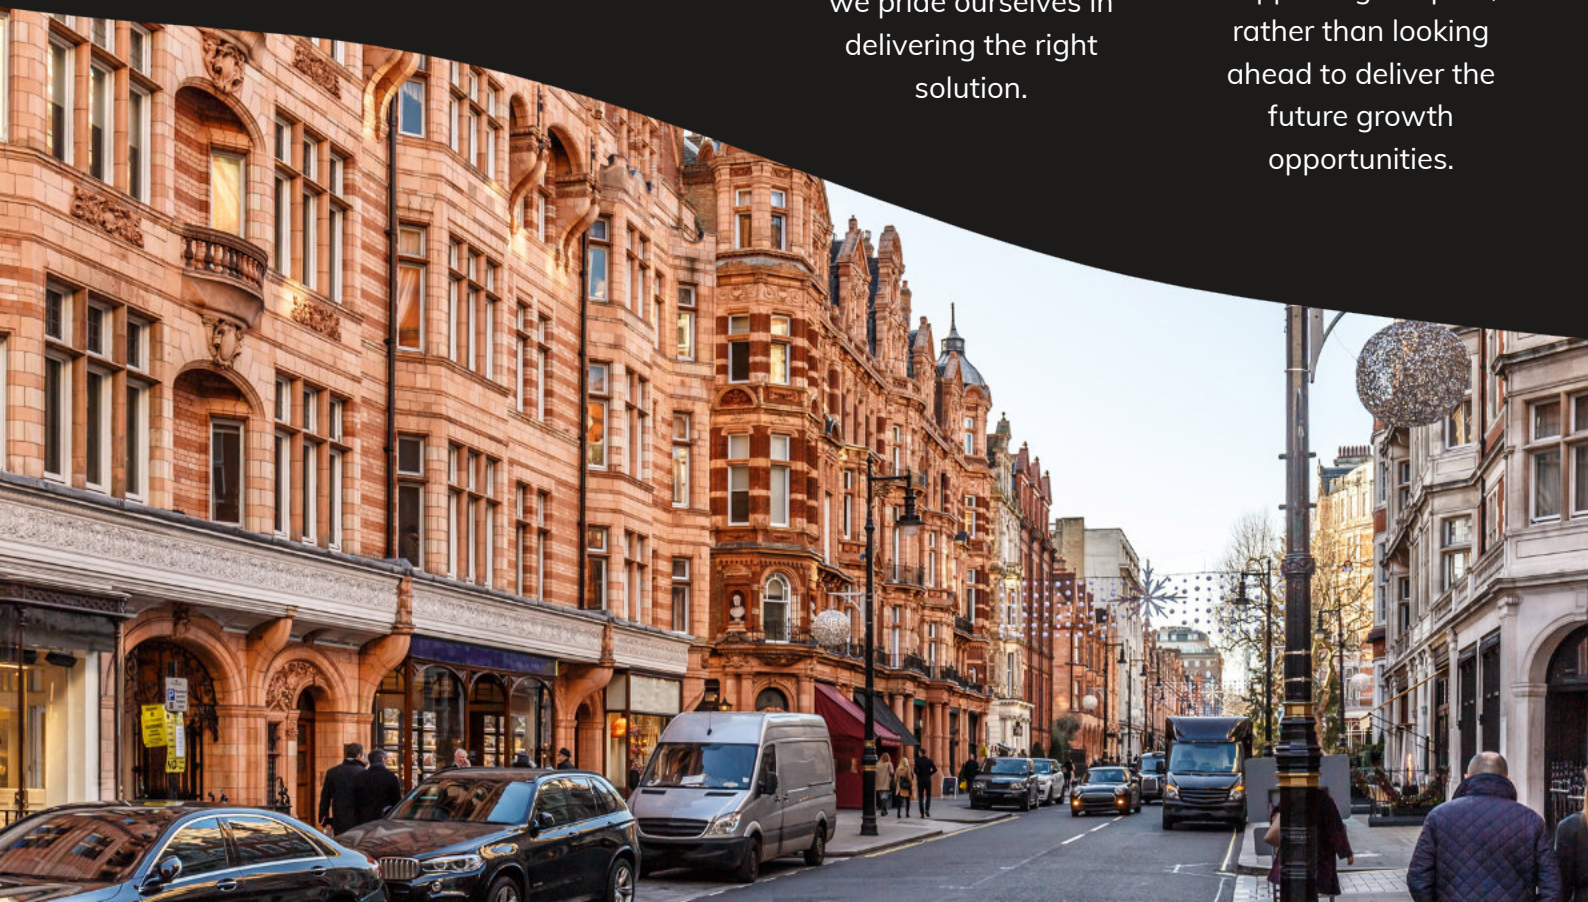

A customer-led approach

We're honest and deliver our services with a high level of integrity. That means we pride ourselves in delivering the right solution.

Education-centered service

Most IT providers look backwards – supporting the past, rather than looking ahead to deliver the future growth opportunities.

Our Solutions.

Solutions to <u>solve</u> your IT challenges.

IT Support.

All solutions are either on your premises, dependent on current systems and requirements, or on the cloud. TipTop manages your mission-critical and standard information technology systems and software, where required, plus any backups and continuity aspects.

IT Security.

With solutions and a multi-layered approach - we can protect and secure your critical data, preventing threats from entering your IT systems all together.

Enjoy peace of mind knowing that your data is protected.

The Cloud.

TipTop's flexibly priced, cloud computing solutions enable you to maximise efficiencies and minimise resources, working smart from any location. Employees can use all of the office applications usually available to them from any device, from any location, home/office/client site.

Connectivity.

TipTop provides a bespoke solution to work with you and advises on best-fit requirements for each individual business to deliver an independent, integrated communications and IT solution.
